## A Note From Iacoletti Software

WhatsTheCatch Claude v1.0 is the Claude-powered successor to WhatsTheCatch v1.0 — a free application that was originally powered by Google Gemini 3.1 Pro Preview.

### What Google Did

**NOTICE** On March 25, 2026, without a single word of warning to developers or users, Google yanked the free API tier for Gemini 3.1 Pro Preview — the model powering the original WhatsTheCatch. This is a textbook bait and switch. Google lured developers onto their platform with free access, allowed us to build real, working applications, and then flipped a switch to monetize everything we built — turning our work into a revenue stream for them without our knowledge or consent.

### Applications Taken Offline

As of March 27, 2026, Iacoletti Software permanently retired the following Google-powered applications:

Application	Engine	Status
WhatsTheCatch v1.0 (Gemini)	Google Gemini 3.1 Pro Preview	Permanently offline — March 27, 2026
ScamCheck v4.2 Platinum (Gemini)	Google Gemini 3.1 Pro Preview	Permanently offline — March 27, 2026
DescribeThat v1.0 (Gemini)	Google Gemini 3.1 Pro Preview	Permanently offline — March 27, 2026

### Why Anthropic, and Why It Costs Money

After taking those applications offline, Iacoletti Software evaluated alternatives and chose Anthropic Claude as the new engine. Anthropic is honest about its pricing — the API has never been advertised as free. Claude Sonnet outperforms Gemini on document review tasks, costs less per analysis than Google now charges for equivalent work, and Anthropic has not engaged in the kind of developer deception that Google demonstrated.

**NOTE** This application is not free. You pay Anthropic directly for your API usage at approximately \$0.05–\$0.20 per document review. Iacoletti Software receives no portion of this fee. Your money goes entirely to Anthropic for the AI processing. See Section 1B for full cost details.

Free Google APIs were not a sustainable foundation for real applications. WhatsTheCatch Claude v1.0 runs on the Anthropic Claude API instead — it is not free, but at pennies per document review it is the next best thing.

You get a superior document analysis model, honest pricing, and an AI company that has not pulled the rug out from under its developers.

## WhatsTheCatch Claude — AI Legal Document Intelligence

---

WhatsTheCatch Claude v1.0 is an AI-powered legal document review engine that analyzes PDF documents for risks, red flags, missing protections, and actionable concerns. It delivers a fully structured attorney-level report with a risk score (0–100), a verdict, an executive summary, and a detailed breakdown of every finding.

Feature	Description
<b>Legal Documents</b>	Contracts, agreements, court filings, leases, wills, powers of attorney
<b>Financial Documents</b>	Loans, mortgages, promissory notes, financial statements, audits
<b>Medical Documents</b>	Medical records, insurance forms, informed consent, billing documents
<b>Business Documents</b>	NDAs, employment agreements, corporate docs, business policies
<b>3.2 MB File Support</b>	Accepts PDF documents up to 3.2 MB — covers the vast majority of real-world documents
<b>PDF Only</b>	DOCX and DOC not supported — export to PDF first

### What Makes WhatsTheCatch Extraordinary

Most document review tools flag keywords. WhatsTheCatch performs attorney-level reasoning across 10–12 distinct review categories specific to each document type. It identifies one-sided terms, missing protections, predatory clauses, and integrity issues — not just surface-level red flags. Every analysis includes a scored verdict, an executive summary, and a thorough breakdown of every individual finding with its real-world impact explained in plain language.

## SECTION 1 — Getting Started: Anthropic API Key Setup

WhatsTheCatch Claude runs entirely in your web browser. No installation required. To use it, you need one thing: a personal Claude API key from Anthropic.

### What You Need

Requirement	Detail
Device	Any modern smartphone, tablet, laptop, or desktop computer
Browser	Latest version of Chrome, Firefox, Edge, or Safari
Internet	Required for communication with the Claude engine
Anthropic Account	Free account at <a href="https://console.anthropic.com">console.anthropic.com</a>
API Key	Claude API key generated from the Anthropic Console
Minimum Funding	A \$5 credit purchase is required to activate your key — no free tier

**WARNING** If you have a Claude Pro subscription (\$20/month at [claude.ai](https://claude.ai)), it does NOT provide API credits and cannot be used with WhatsTheCatch. Claude Pro and the Anthropic API are completely separate products with completely separate billing. You must create a Console account and purchase API credits independently.

### Step-by-Step Account Setup

Complete these steps in order. Do not generate your API key until your account is fully funded.

1. **Create Your Anthropic Console Account.** Go to [console.anthropic.com](https://console.anthropic.com) and sign up using Google or an email address. Verify your email when prompted. This is separate from [claude.ai](https://claude.ai).
2. **Accept Usage Policies.** Review and accept Anthropic usage policies when prompted during signup.
3. **Add a Payment Method.** Go to Settings > Billing and click Add Payment Method. Enter your credit card details. Anthropic accepts all major credit and debit cards.
4. **Purchase a Minimum of \$5 in Credits.** Click Add Credits and purchase at least \$5. This is mandatory — your API key will not function on an unfunded account. Credits never expire.
5. **Set a Spending Limit.** Go to Settings > Limits and set a monthly spending cap. \$5–\$10/month covers most personal use. Strongly recommended.
6. **Generate Your API Key.** Go to API Keys in the left sidebar or visit [console.anthropic.com/settings/keys](https://console.anthropic.com/settings/keys). Click Create Key, give it a name such as ‘WhatsTheCatch’, and click Create.
7. **Copy the Key Immediately.** Your key starts with sk-ant-... Copy it the moment it appears — you cannot view it again after closing the dialog. Paste it into a password manager first.
8. **Paste Into the App.** Open WhatsTheCatch Claude, paste your key into the API key field, and click Save & Activate. The key is stored in your browser only — never transmitted to Iacoletti Software.

**NOTE** The Anthropic API is pay-per-use. There is no free tier — you must fund your account before generating a usable API key. Monitor your usage at [console.anthropic.com](https://console.anthropic.com).

## SECTION 1A — Funding Your API Key

WhatsTheCatch Claude runs on the Anthropic pay-as-you-go API. You pay only for what you use — there is no subscription fee. A minimum purchase of \$5 is required to activate your API key.

### How to Add Credits

1. Go to the Billing Page. Open [console.anthropic.com](https://console.anthropic.com) and click Settings in the left sidebar, then select Billing.
2. Click Add Credits. Select the amount you wish to add. The minimum is \$5. Credits never expire.
3. Enter Payment Details. Anthropic accepts Visa, Mastercard, American Express, and Discover. Debit cards are also accepted.
4. Confirm Purchase. Credits are added instantly. Your API key becomes active immediately.

**TIP** Set up auto-recharge under Settings > Billing to ensure your key never goes inactive mid-session. Set the threshold to \$2 and the recharge amount to \$10 for uninterrupted access.

## SECTION 1B — Understanding Your Costs

WhatsTheCatch Claude uses Anthropic’s claude-sonnet-4-6 model. You are billed only for the tokens used in each review. There is no monthly fee and no per-seat charge.

### Token Pricing (claude-sonnet-4-6)

Token Type	Rate
Input Tokens (your document + prompt)	\$3.00 per million tokens
Output Tokens (Claude’s review)	\$15.00 per million tokens

### Real-World Cost Examples

The following costs are based on actual scans run during development and testing:

Document	Tokens Used	Approximate Cost
<b>2-page court order (3.09 MB PDF)</b>	31,413 in / 4,933 out	~\$0.17
<b>Short NDA (0.8 MB PDF)</b>	12,011 in / 4,852 out	~\$0.11
<b>Medical consent form (0.3 MB PDF)</b>	5,378 in / 2,454 out	~\$0.05
<b>Financial loan agreement (1.2 MB PDF)</b>	28,911 in / 4,536 out	~\$0.15
<b>Multi-page business contract (2.5 MB PDF)</b>	50,223 in / 5,315 out	~\$0.23
<b>404-page District Court Judges Benchbook (2.86 MB PDF)</b>	945,101 in / 2,839 out	~\$2.88

**NOTE** A typical document review costs between \$0.05 and \$0.25, but in rare cases it could be as high as \$2.88. For comparison, a real attorney would probably bill \$150–\$500 for the same first-pass document review. A \$5 credit purchase normally covers approximately 20–50 document reviews.

## Monitoring Your Usage

The review results panel displays your exact token usage and cost for every scan:

- Input tokens (↑) with dollar cost
- Output tokens (↓) with dollar cost

You can also monitor cumulative API usage at [console.anthropic.com](https://console.anthropic.com) under the Usage section.

## SECTION 2 — How to Upload Documents

WhatsTheCatch Claude accepts PDF files up to 3.2 MB. The upload process is simple and designed for both technical and non-technical users.

### Upload Process

1. **Select a Category.** Choose the document category that best matches your document: Legal, Financial, Medical, or Business. This tells the AI which attorney-level review protocol to apply.
2. **Upload Your Document.** Click the “Import PDF” button or drag and drop your file into the drop zone. Accepted format: PDF only. Maximum size: 3.2 MB.
3. **Verify the Staged File.** Once uploaded, the file name and size appear confirming it is ready. Click the X to remove it if you need to change files.
4. **Begin Legal Review.** Click the “BEGIN LEGAL REVIEW” button. The progress bar will animate while Claude analyzes your document. A full analysis typically returns within 15–45 seconds.

### Supported File Formats

Format	Notes
PDF (.pdf)	Full support — the only accepted format

**NOTE** WhatsTheCatch Claude currently supports PDF files only. DOCX and DOC files are not natively supported. If your document is in Word format, convert it to PDF first via File → Export or File → Save As → PDF. Microsoft Word, Google Docs, and LibreOffice all support this.

## SECTION 3 — Understanding the Four Review Categories

Selecting the correct category is the most important step. Each category activates a completely different attorney-level review protocol with its own checks, flags, and standards.

Category	Document Types & Review Focus
<b>Legal</b>	Contracts, Agreements, Court Filings, Leases, Wills, Powers of Attorney Parties & authority · Obligations & rights · Indemnification & liability · IP ownership · Termination clauses · Dispute resolution · Unusual or risky clauses · Missing standard protections · Document integrity
<b>Financial</b>	Loans, Mortgages, Promissory Notes, Financial Statements, Audits Principal, rate & payment schedule · Fees & penalties · Default provisions · Collateral & security · Financial covenants · Personal guarantees · Regulatory compliance · Predatory or unusual terms
<b>Medical</b>	Medical Records, Insurance Documents, Consent Forms, Billing Patient identity & provider credentials · Diagnosis accuracy · Informed consent · HIPAA & privacy · Insurance billing accuracy · Medication safety · Liability waivers · Record integrity
<b>Business</b>	NDA's, Corporate Docs, Employment Agreements, Business Policies Corporate authority · IP ownership & assignments · Non-compete scope · Confidentiality · Revenue, equity & compensation · Regulatory compliance · Change of control provisions · Unusual or risky clauses

**NOTE** If your document spans multiple categories (e.g., a business loan that is both financial and legal), choose the category matching the primary purpose. The AI will still identify relevant issues from other domains within its findings.

**IMPORTANT** Each review category provides AI-assisted document analysis for informational purposes only. This does not constitute legal, medical, or financial advice. Always consult the appropriate licensed professional before making any decision based on these results.

## SECTION 4 — Reading & Interpreting Your Results

After analysis completes, the Document Review Report appears. The report is organized into distinct sections for easy navigation.

### The Metadata Panel

At the top of the report, a metadata strip displays key information about the document you submitted:

- File name and size
- Page count (extracted from the PDF)
- Last modified date
- MIME type

## The Risk Score

The circular dial displays the overall risk score from 0 to 100, reflecting the severity and volume of issues found.

Score	Risk Level & Meaning
0 – 24	Low — Clean, standard document. No significant issues found.
25 – 49	Medium — Minor issues present. Generally workable with awareness.
50 – 79	High — Meaningful issues that warrant negotiation or professional review.
80 – 100	Critical — Seriously flawed, dangerous, or potentially fraudulent document.

## Results Sections

Section	What It Contains
<b>Document Type</b>	The AI’s identification of the specific document type (e.g., “Commercial Lease Agreement”)
<b>Verdict</b>	One of five bottom-line conclusions: CLEAN · REVIEW RECOMMENDED · CONCERNS FOUND · HIGH RISK · DO NOT SIGN
<b>Executive Summary</b>	Structured narrative: (1) Document Overview (2) Key Findings (3) Overall Assessment
<b>Key Parties</b>	All named parties, entities, and signatories identified in the document
<b>Important Dates</b>	Execution date, effective date, expiration, renewal deadlines, payment due dates
<b>Financial Terms</b>	Amounts, interest rates, fees, penalties, and payment schedules (empty if none)
<b>Findings</b>	Every individual issue found, grouped by review category, with severity badge and plain-language explanation
<b>Missing Protections</b>	Standard clauses absent but expected for this document type, with explanation of why each matters
<b>Recommendations</b>	Specific, actionable steps to take before signing or acting on this document

## Understanding Finding Severity

Severity	Meaning
<b>Info</b>	Noteworthy but not problematic. Standard terms worth understanding.
<b>Caution</b>	Slightly unusual or one-sided. You should be aware this term exists.
<b>Warning</b>	Problematic term that should be negotiated or clarified before signing.
<b>Critical</b>	Seriously dangerous, predatory, or potentially fraudulent. Requires immediate attention.

## The Verdict

Verdict	Meaning
<b>CLEAN</b>	No significant issues found. Document appears standard and fair.
<b>REVIEW RECOMMENDED</b>	Minor issues present. Generally signable but worth a closer look.
<b>CONCERNS FOUND</b>	Meaningful issues that should be resolved before signing.
<b>HIGH RISK</b>	Serious issues present. Strongly recommend consulting the appropriate licensed professional.
<b>DO NOT SIGN</b>	Document contains dangerous, fraudulent, or predatory terms. Do not sign without significant changes and professional review.

## SECTION 4A — Document Metadata, Token Costs & Export

Every Document Review Report includes three additional panels beyond the findings: the document metadata strip, the token and cost display, and the export controls.

### Document Metadata Panel

Immediately below the report header, a metadata strip displays key information about the PDF you submitted. This data is extracted entirely client-side from your browser — it never leaves your device.

Metadata Field	What It Shows
<b>File</b>	The original filename of the uploaded PDF (e.g. “2012 Court Order.pdf”)
<b>Size</b>	The file size displayed in MB (e.g. “3.09 MB”)
<b>Pages</b>	The page count extracted from the PDF structure (e.g. “2 pages”)
<b>Modified</b>	The last-modified date recorded in the PDF file (e.g. “Jan 15, 2013”)
<b>Type</b>	The MIME type of the file — always “application/pdf” for supported uploads

**NOTE** Page count is extracted by a fast heuristic scan of the PDF binary. For most standard PDFs this is accurate. For unusual PDF structures (e.g. heavily encrypted files), the count may be missing or approximate. This is cosmetic only — the review itself is unaffected.

### Important Notice Banner

Directly below the metadata panel, every report displays a prominent amber Important Notice banner:

**NOTICE** The following report reflects the views of Claude AI and does not constitute legal, financial, medical, or business advice. If the results obtained from this scan are a cause for concern, consult a professional immediately.

This notice appears on every report without exception and is included in all exported files (TXT and PDF).

## Token Usage & Cost Display

Below the risk score dial in every report, WhatsTheCatch Claude displays the exact token usage and dollar cost for that specific review.

Display Element	What It Means
↑ [count] \${amount}	Input tokens — consumed by your document content and the review prompt. Billed at \$3.00 per million tokens.
↓ [count] \${amount}	Output tokens — generated by Claude’s structured review response. Billed at \$15.00 per million tokens.

### Example from an actual review of a 2-page, 3.09 MB Final Order of Divorce:

Token Type	Count	Cost
Input (↑)	31,413 tokens	\$0.0942 (9 cents)
Output (↓)	4,933 tokens	\$0.0740 (7 cents)
<b>Total</b>	<b>36,346 tokens</b>	<b>\$0.1682 (17 cents)</b>

**NOTE** Input tokens are almost always much higher than output tokens. Your entire PDF document is converted to text and sent to Claude as part of the input along with the detailed review prompt. The output is just Claude’s structured JSON response. A larger or more text-dense document will always produce proportionally higher input token counts.

## Exporting Your Report

Every completed review can be saved using the two export buttons in the top-right corner of the report header. Both formats include the complete report.

Button	What It Does
Save as Text (file icon)	Downloads a plain text .txt file of the full report. Readable in any text editor, email client, or word processor. Ideal for pasting into other documents or sharing via email.
Save as PDF (PDF icon)	Opens a print-ready formatted version in a new browser tab and triggers the print dialog. Select “Save as PDF” as the printer to save a formatted PDF. Suitable for sharing with attorneys, advisers, or keeping in your records.

## What Is Included in Every Export

Report Content	Text Export	PDF Export
Document metadata (file, size, pages, modified)	✓	✓
Important Notice disclaimer	✓	✓
Risk score and risk level	✓	✓
Verdict	✓	✓
Executive summary	✓	✓
Key parties	✓	✓
Important dates	✓	✓
Financial terms	✓	✓
All findings with category, severity & detail	✓	✓
Missing protections	✓	✓
Recommendations	✓	✓
Token usage and cost	✓	✓

**WARNING** WhatsTheCatch Claude does not store reviews anywhere. Once you close the browser tab or click Clear Results, the report is gone permanently. The export buttons are the only way to save your results. Export before clearing.

## SECTION 5 — Key Features & Capabilities

Feature	Description
<b>3.2 MB PDF Support</b>	Accepts PDF documents up to 3.2 MB — covers the vast majority of real-world legal, medical, financial, and business documents
<b>Four Attorney Protocols</b>	Legal, Financial, Medical, and Business — each activating a completely different 10–12 point review checklist
<b>10–25 Findings Per Review</b>	A thorough review produces 10–25 individual findings with category, title, severity, and plain-language explanation
<b>Document Metadata Extraction</b>	File name, size, page count, and modification date extracted client-side and displayed in the report header
<b>Forensic Risk Score 0–100</b>	Calibrated thresholds for Low, Medium, High, and Critical risk levels
<b>Five-Verdict System</b>	CLEAN · REVIEW RECOMMENDED · CONCERNS FOUND · HIGH RISK · DO NOT SIGN

Feature	Description
<b>Missing Protections</b>	Flags standard clauses that are absent but expected for the document type
<b>Privacy-First Architecture</b>	API key and results stored only in your browser — never transmitted to Iacoletti Software
<b>Token &amp; Cost Display</b>	Real-time display of input tokens, output tokens, and scan cost in every report
<b>Export to Text &amp; PDF</b>	Save your full review report as a plain text file or a formatted print-ready PDF
<b>Important Notice Banner</b>	Prominent disclaimer in every report reminding users to consult a professional for concerning results
<b>Claude Sonnet Engine</b>	Powered by Anthropic claude-sonnet-4-6 — structured JSON output via prompt engineering

## SECTION 6 — Scoring & Risk Levels

WhatsTheCatch’s scoring model was engineered to reflect both the severity and the count of issues found. A document with one Critical finding and a document with fifteen Warning findings may both score in the High range.

### Score Calibration

Score Range	Risk Level
<b>0 – 24</b>	Low — Clean or standard document
<b>25 – 49</b>	Medium — Minor issues, generally workable
<b>50 – 79</b>	High — Significant issues requiring attention
<b>80 – 100</b>	Critical — Dangerous or severely defective document

### Severity Guide

Severity Level	Definition
<b>Info</b>	Standard term worth understanding. Not problematic on its own.
<b>Caution</b>	Slightly unusual or one-sided. Client should be aware before signing.
<b>Warning</b>	Problematic. Should be negotiated or clarified before signing.
<b>Critical</b>	Seriously dangerous, predatory, or potentially fraudulent. Requires immediate professional review.

**NOTE** The score reflects the AI’s overall assessment of document risk. It is not a legal opinion. A low score does not mean a document is suitable for your specific situation — always consult a licensed professional for high-stakes decisions.

## SECTION 7 — Best Practices

Do	Don't
Use PDF format — convert DOCX/DOC before uploading	Share your API key with anyone
Select the correct category before uploading	Close the browser tab while a review is running
Review all sections — not just the verdict	Rely solely on AI results for high-stakes decisions
Use for pre-signing review — before you commit	Upload files larger than 3.2 MB
Export to PDF or TXT to save your report	Assume the score alone tells the full story
Store your API key in a password manager	Use on a public or shared computer without clearing browser data afterward
Consult a professional for Critical findings	Assume AI output is 100% infallible
Monitor your API credit balance regularly	Be surprised by credit exhaustion — check <a href="https://console.anthropic.com">console.anthropic.com</a> regularly

### Tips for Best Results

Topic	Guidance
PDF Quality	Text-based PDFs produce the most complete reviews. Scanned image PDFs may yield less detail.
Category Selection	A lease reviewed as 'Business' instead of 'Legal' will miss key legal checks. Take a moment to select carefully.
Read All Sections	Do not stop at the verdict. Findings, Missing Protections, and Recommendations often contain the most important details.
Complex Documents	For documents spanning multiple categories (e.g., a medical settlement with legal terms), consider reviewing under both applicable categories.
Professional Consultation	If WhatsTheCatch returns HIGH RISK or DO NOT SIGN, or surfaces Critical severity findings, consult a licensed professional before proceeding.

## SECTION 8 — Troubleshooting

Issue	Likely Cause	Solution
<b>Review failed or JSON error</b>	Malformed API response	Try again — the app will retry automatically. If persistent, try a smaller PDF.
<b>Analysis slow (30–90 seconds)</b>	Normal for large, complex documents	This is expected. Keep the tab open and allow up to 60 seconds.
<b>HTTP 413 error</b>	File exceeds 3.2 MB after base64 encoding	Compress the PDF or reduce its size before uploading.
<b>‘Failed to fetch’ error</b>	API key not set, expired credits, or network issue	Check your API key is active and your credit balance at <a href="https://console.anthropic.com">console.anthropic.com</a> .
<b>‘Invalid API key’ error</b>	Key entered incorrectly or revoked	Click Change on the API Key panel, remove the key, and paste it again from the Anthropic Console.
<b>‘Credit balance too low’</b>	API credits are exhausted	Add more credits at <a href="https://console.anthropic.com/settings/billing">console.anthropic.com/settings/billing</a> . Minimum \$5.
<b>Begin Review button grayed out</b>	No document staged	Upload a PDF file first — the button activates only after a document is staged.
<b>Results seem incomplete</b>	PDF may be image-based or low quality	Use a text-based PDF if possible. Try re-running the review on the same file.
<b>Page count shows incorrect value</b>	Unusual PDF structure	Page count is extracted by a fast heuristic scan. This is cosmetic only — the review itself is unaffected.

## SECTION 9 — Data Security & Privacy

WhatsTheCatch Claude was designed from the ground up with privacy as a core principle.

### What Iacoletti Software Sees

Nothing. Your API key, document files, and results are stored exclusively in your browser’s local memory. They are never transmitted to Iacoletti Software servers.

### What Anthropic Sees

When you submit a document for analysis, it is sent directly from your browser to Anthropic’s Claude API using your personal API key. Anthropic processes the request under your account, encrypts the results, and sends it back to your browser. Review Anthropic’s data usage policies at [anthropic.com/privacy](https://anthropic.com/privacy) for more information.

Item	Detail
<b>API Key Storage</b>	Browser localStorage only — never transmitted to Iacoletti servers

Item	Detail
Document Files	Sent directly from your browser to Anthropic Claude API — never via Iacoletti servers
Results	Displayed in your browser only — never stored anywhere
Analytics	Page visit counts only — no document content, no personal data
Encryption	All API calls use HTTPS/TLS encryption in transit

**WARNING** The Anthropic API is not designed for processing classified, privileged, or highly sensitive documents. Do not upload documents containing classified government information, attorney-client privileged communications, or third-party personal health information without authorization. Review Anthropic’s privacy policy before uploading sensitive material.

## SECTION 10 — Disclaimer & End User License Agreement

### About This Tool

WhatsTheCatch Claude v1.0 is provided for informational purposes only. It is powered by Anthropic Claude Sonnet, a state-of-the-art AI model. Like all AI systems, it may produce incomplete or imperfect results. We recommend treating WhatsTheCatch’s output as a powerful first layer of review — not a replacement for professional advice. If a review surfaces HIGH RISK or DO NOT SIGN findings, contact the appropriate licensed professional immediately.

**IMPORTANT** WhatsTheCatch Claude is provided for informational purposes only. It does not constitute legal, medical, or financial advice of any kind. Legal advice can only be provided by a licensed attorney. Medical advice can only be provided by a qualified medical practitioner. Financial advice can only be provided by a licensed financial professional. Iacoletti Software is not responsible for any damages, losses, or adverse outcomes arising from the use of, or reliance upon, the results produced by this tool.

### End User License Agreement (EULA)

**Project:** WhatsTheCatch Claude v1.0    **Licensor:** Iacoletti Software    **Effective Date:** March 2026

#	Clause	Terms
1	License Grant	Iacoletti Software grants you a personal, non-exclusive, non-transferable, revocable license to use the Software for personal, educational, and non-commercial professional use.
2	Intellectual Property	The Software is the exclusive intellectual property of Iacoletti Software. All rights, title, and interest — including the review architecture, document analysis schemas, and underlying algorithms — remain solely with Iacoletti Software.

#	Clause	Terms
3	Restrictions	You shall not reverse engineer, decompile, disassemble, redistribute, sell, sublicense, modify, or create derivative works based on the Software without prior written consent.
4	Confidentiality	The Software contains proprietary trade secrets. You shall not disclose performance benchmarks, internal logic, code snippets, or screenshots of the backend to third parties without prior written consent.
5	Warranty Disclaimer	THE SOFTWARE IS PROVIDED “AS IS” WITHOUT WARRANTY OF ANY KIND. IACOLETTI SOFTWARE DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
6	Limitation of Liability	IACOLETTI SOFTWARE SHALL NOT BE LIABLE FOR ANY INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OF OR INABILITY TO USE THE SOFTWARE.
7	Termination	This license is effective until terminated. Iacoletti Software may terminate this Agreement if you fail to comply with any term. Upon termination, cease all use of the Software.
8	Governing Law	This Agreement is governed by the laws of the Commonwealth of Virginia, without regard to its conflict of laws principles.
